

# GLOBALJIG®

## Evolution 5000

NEW

Monocube jig.

To facilitate the loading of vehicles with the electric winch, the bench can be inclined, maintaining the minimum heights for the safety of the body repairer.

New, quick locking system to position and direct the pull arm. Ideal for any type of pull up to 10 T, and for frequent directional positioning.

## TECHNOLOGY AND INNOVATION, APPLIED TO NEW AND FUTURE REPAIR CONCEPTS.

The New Evolution 5000, design and mechanical innovation, construction design considered by all the experts in the field an unmistakable choice for the modern body repairer.

The Globaljig international patent is the confirmation that the universal jig in micro-cast steel with the single-screw fast locking is unique in terms of precision and robustness.

The new data base DVD allows the consultation of the data of all the cars to be repaired, even with mechanics mounted and in three-dimensional format, for rapid diagnosis and structural checks that offer the body repairer total safety and reliability for a sure result.

For over 35 years the GLOBALJIG brand has been synonymous with competence and innovation, approved by the most important car manufacturers in the world.

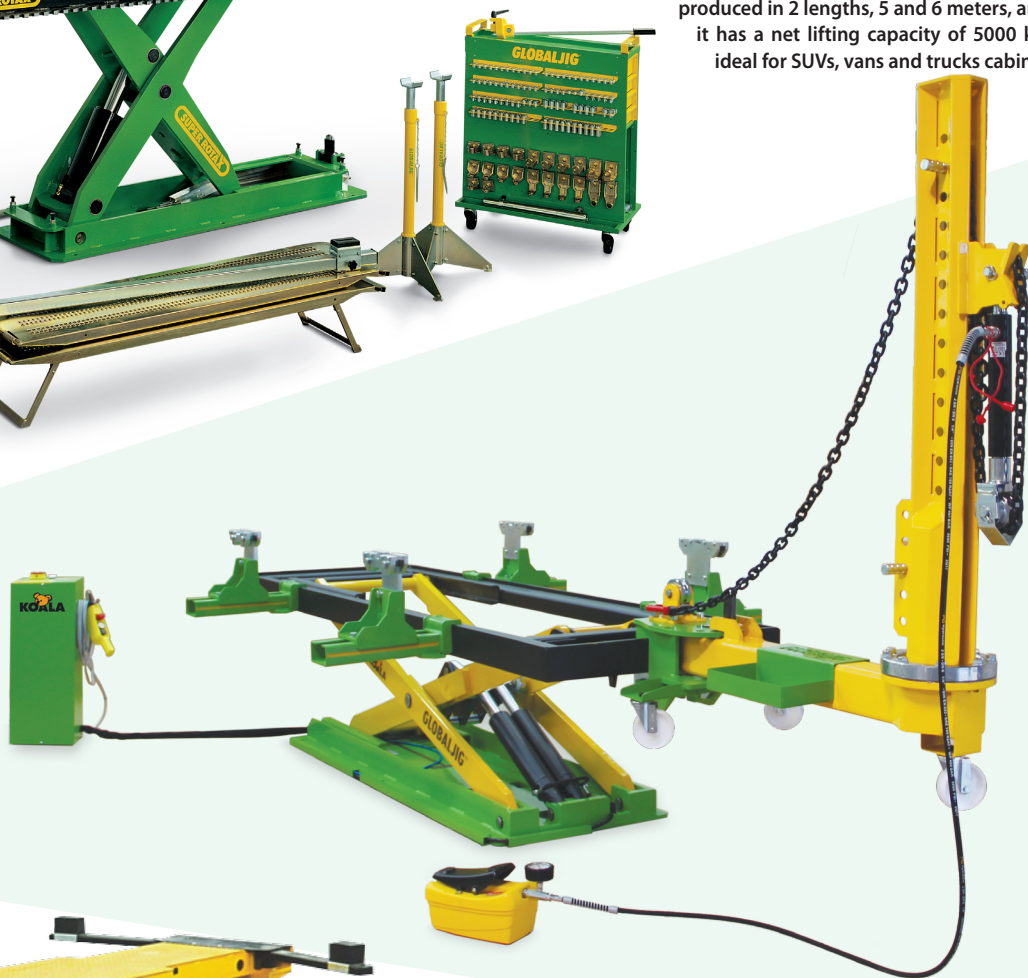

## SUPER ROTAX

SUPERROTAX - Unmistakable style, the forefather of the universal jig benches with one or more rotating pulling towers along the entire perimeter of the bench. It represents a new concept in straightening systems: it is considered the flagship of GLOBALJIG range for body shops keeping up with the most advanced technologies. "SuperRotax" is produced in 2 lengths, 5 and 6 meters, and it has a net lifting capacity of 5000 kg. ideal for SUVs, vans and trucks cabins.

## KOALA

KOALA - The solution for all today's lifting and quick repair operations with great pulling power, ideal for straightening and replacing parts of cars. It can be used for all aspects of body repair including diagnosis for evaluation and estimating.

## DAKOTA

DAKOTA - The new lift for prep stations and spray booths, unique for its characteristics. It has a net lifting capacity of 3000 kg with minimum space (6 cm.), allowing the opening of 4 arms. Recommended and approved by the most important car manufacturers.
